Yovzhenko Alexander

Junior JavaScript Developer

I am a beginner JavaScript developer. I am 33 years old, I decided to change my profession and become a programmer. In programming, I like many ways to solve a problem and find the best one. I have a solid knowledge of JavaScript, HTML, CSS, Node.js. I am ready to solve the tasks set for the company, work in a team and find the best solution together. I continue to study and develop in order to achieve high results in programming.
